

# STACK YOUR TECH

Automate your processes and leverage lease data in every area of your business with the Integrations Hub in Visual Lease.

Introducing a powerful solution to automate workflows, unlock key business insights and deliver end-to-end compliance across your lease portfolio.

The Integrations Hub is system-agnostic and always-on, allowing users to schedule, monitor, manage and automate data imports and exports to and from Visual Lease seamlessly.

## Automate Your Workflows

Streamline data flow across your portfolio and technology ecosystem

## Eliminate Uncertainty

Always-on integrations mean no more manual entry errors

## Elevate Your Data

Unlock key insights and track every transfer

The Integrations Hub makes it easy to connect the systems most important to your business, including all major ERP systems, asset management, property management and business intelligence tools, and provides options to make it happen:

## Secure Managed File Transfers

Automated SFTP file transfers for secure, easily auditable file transfers

## Flexible APIs

Dream big in the Developer Portal and build what you want with flexible REST APIs

## Real-Time Dashboard

Track every transfer and get ahead of any issues with a real-time visualization of data in flight
